SUMMARY

VISION

TO CO-CREATE WITH OUR COMMUNITY A NEXT-GENERATION **DIGITAL ENTERTAINMENT PLATFORM**

Our vision and mission is to build a next-generation digital entertainment platform for all users. We will return the Individual Digital Sovereignty of user-generated game props and other digital assets to users, share revenue with the community, and co-create our own Metaverse with all participants. In the future, users will be able to create their own subworlds to get rewards and claim Individual Digital Sovereignty. Everyone will be proud to announce: We come, we create, we own. **PROJECT HIGHLIGHTS**

► INDIVIDUAL DIGITAL SOVEREIGNTY

Matr1x platform will allow users to mint game prop assets and

token assets first on Polygon and later on other public chains. Users can deposit their NFTs and perform their functions on the Matr1x platform, or withdraw the in-game NFTs to third party wallets at any time. **▲ GAME TRILOGY**

We will interpret our game trilogy through three large-scale games with a unified worldview: Matr1x FIRE(FPS), Matr1x WAR

(Shooting+MMORPG), and Matr1x EVOLUTION(SOC). Our games allow players to explore our elaborately created metaverse step by step. **▶** NFT On Matr1x platform, there will be millions of differentiated NFTs:

guns, gloves, knives, stamps, PFPs, avatars, lands, planets and game privileges, etc, which can be traded and exchanged freely. All NFTs

can be used across games and carried forward to new episodes.

▲ GOVERNANCE MAX token holders can stake MAX tokens for ve-MAX to accumulate voting powers, specifically for vault management, community management, content management, technology & product related upgrades, etc.

▶ COMMUNITY

We strive to build product communities, X-to-earn communities and clubs as three pillars of Matr1x DAO. X-to-earn communities help us to reach some crucial goals, including content creation and dissemination, anti-cheat, game live stream and Esports, etc. EXPERIENCED TEAM

Our team members include gaming OGs who have developed top mobile games with accumulated revenue of over USD 3 billion, and

top engineers in blockchain and system architecture.

WHAT IS MAX COIN

▲ GOVERNANCE

MAX Coin is not only the governance token for Matr1x FIRE, but also the platform governance token for the whole Matr1x system. MAX Coin will be issued as an ERC-20 token and deployed on Polygon soon. Maximum supply of MAX Coin is 1 billion.

STAKING By staking MAX Coin tokens, users will get ve-MAX Coin token,

which represents governance rights in the Matr1x platform, including Esports Club qualifications, Esports tournaments, vault allocation, platform operation, community management, as well as new game development in the future. **► VAULT ALLOCATION**

No less than 85% of net platform revenue will be allocated into

the vault. Platform revenue represents revenue from the royalties and transaction fees in our NFT marketplace and DEX. Net platform revenue equals to gross platform revenue deducted by related commissions, channel costs, and NFT collaboration costs. Non-platform revenue, defined as project revenue from players' in-game consumption, will be allocated to the Team, mainly used to cover daily operating expenses.

Our Hero Squad starts their first adventure in Cyber Earth, a high-tech

WORLDVIEW

world, where serious conflicts arise as limited resources on earth are rapidly exhausted. Some superpowers, such as the Uranus, continue

FIRST ACT: CYBER EARTH - MATR1X FIRE

to divide the world and constantly clash against each other. They also fight against Matr1x Alliance, major force of The Resistance. As our first game, Matr1x FIRE is a shooting game focusing on PVP multiplayer fair competition, while providing strategic casual PVE gameplay modes, classic 5V5 battles, Battle Royale gameplay mode etc. **SECOND ACT: MARS IMMIGRATION - MATR1X WAR** Years after the first episode, people decide to turn Mars into their

second home, preparing for large-scale immigration from Earth. However, the fight between the Uranus and the Resistance spreads

to Mars. Matr1x WAR is a MMORPG game based on shooting, in which players can choose different professions, collect and develop

gears, complete team missions in the name of Guilds, City States, Federations, etc. THIRD ACT: INTERSTELLAR EXPEDITIONS - MATR1X **EVOLUTION** People ultimately turn their attention to the deeper space and parallel universes, by sending task forces to different galaxies and different

subworlds for spreading human civilization. In Matr1x EVOLUTION,

players can have their own planets, open worlds randomly generated

with various lands, resources, and creatures, where random events

happen. They can also interact with other players' planets by defending, attacking or making alliances.

WORLDVIEW STORY Our story OGs will be responsible for the worldview story (more than one million words) about the future cyberpunk world. Moreover, we will launch Creator Community to co-develop our Worldview Story and other related IPs in Matr1x DAO.

FIRE COIN: Game tokens are used for various burning mechanics in the

STABLE COIN: As a widely-used stable coin, USDC is used as the

NFT: Avatars are the roles players use for combat, while high-quality

game, such as avatar upgrade, case opening and weapon casting.

EXPERIENCES

Currency Exchange

Pass holders will have the privilege

avatars allow players to earn FIRE Coin tokens and obtain weapon cases in the game. Players can open cases to get a variety of NFT props, including combat weapons in the game. Various skins can be applied to weapons, but they will not change weapon attributes.

TOKENOMICS

in-game transaction currency.

MAX Coin: After the official launch of our game, players with high Levels and excellent Competitive Match Scores and Mythic-Quality NFT holders will receive random MAX coin airdrops.

Play and Earn

X-to-earn Communities In Matr1x DAO, we will establish all kinds of X-to-earn communities, such as Affiliate Community, Creator Community, Curator Community,

FIRE Coin: FIRE Coin token can be earned by owners of high-quality avatars through playing, and can also be earned by early participants of

Program, in which referrers and affiliates can invite their friends to play together, and get rebates on their consumption. Moreover, we will reward top affiliates with millions of MAX Coins by the end of the seasons.

We will collaborate with different IPs to incubate our own one. We will

also build strong connections with other Web3 communities and DAOs. We can share revenue out of this kind of collaboration. Seed Partner Program During the test period, we will launch our Seed Partner Program,

through which we will recruit IP partners, brand partners, KOLs, creators, builders, and reward them with considerable bonus packages

of MAX coin and NFTs based on their performances.
